

SCHWEIZERISCHE NATIONALBANK
BANQUE NATIONALE SUISSE
BANCA NAZIONALE SVIZZERA
BANCA NAZIUNALA SVIZRA
SWISS NATIONAL BANK 

The Swiss National Bank (SNB), as an independent central bank, conducts a monetary policy that serves the interests of the country as a whole. It ensures price stability and helps to create the conditions for favourable economic development. The **International Policy Analysis** unit provides background analyses and briefs top management of the SNB on international policy issues. To support our team, we are currently looking for two

Research Assistants (100%)

International Policy Analysis

Job description

- You will support our team in policy-oriented empirical projects on international finance. Specifically, you will be responsible for collecting and processing relevant data and drafting documents under the supervision of our experienced staff.

Job requirements

- You should have completed your master's studies in economics when you start the position and have a strong interest in international economics.
- You should have sound knowledge of econometrics and be familiar with common data processing and statistical programs (in particular Stata).
- You should have a working command of English as well as some knowledge of German or French.

These positions are a unique opportunity for students who are considering doctoral studies and would like to gain an insight into applied economic analysis work prior to doing so.

The positions are located in Zurich. The preferred starting date is the beginning of June 2018 with a desired duration of 13 months.

If you are interested in this opening and meet the necessary requirements, please submit your complete application, including motivation letter, curriculum vitae, university grades and an example of written work, using our [online application tool](#).
