New focus article published on the SNB data portal

How the financial account, the international investment position and the Swiss financial accounts are connected

The Swiss National Bank has today published a new focus article on its data portal (data.snb.ch, [Resources](#), [International economic affairs](#), [Focus articles](#)).

The new article explains how the financial account, the international investment position and the Swiss financial accounts are connected. These three statistics record Switzerland's financial linkages, although each views the data from a different perspective. It also examines the differences in the data in the various statistics, arising from their respective practices.

The focus article thus contributes to a better understanding of the connections between the three statistics and supports data users in selecting the data best suited to their needs.
