Zurich, 18 June 2015

Banks in Switzerland, 2014 edition

Results from the Swiss National Bank's data collection

Summary

In 2014, 246 of the 275 banks in Switzerland recorded an annual profit, taking total profit to CHF 14.2 billion (2013: CHF 11.9 billion). The remaining 29 recorded an annual loss totalling CHF 6.8 billion (2013: CHF 1.4 billion). High extraordinary income, depreciation and amortisation of fixed assets as well as expenses relating to value adjustments, provisions and losses had a significant impact on annual profit and loss.

On the assets side of the balance sheet, amounts due from customers abroad, particularly in US dollars, increased markedly. In Switzerland, the rise in mortgage loans also continued. On the liabilities side of the balance sheet, customer deposits from both Switzerland and abroad once again increased.

Securities held in custody accounts reached a new high, with the rise in share prices constituting a major element in this development. Fiduciary funds administered by the banks have been declining since 2008, and in the year under review, this trend continued, however the decrease was not as great as in previous years. The number of staff working in banks decreased by 1,844 to 125,289 (full-time equivalents). This reduction primarily affected jobs in Switzerland.

Press release**KEY FIGURES***

	2013	2014	Change

* Figures may have been revised since their inclusion in last year's publication. The figures shown in the table are rounded, whereas the changes are calculated on the basis of the exact figures. Consequently, they may deviate from the rounded amounts.

** At offices in Switzerland. Securities held by branches abroad are not included.

The 2014 edition of *Banks in Switzerland* is based on data in banks' (parent companies') individual financial statements, as required by law.¹ The data presented may deviate from consolidated figures, particularly in the case of the big banks' income statement. The SNB's *Financial Stability Report*, by contrast, which is released at the same time as *Banks in Switzerland*, uses consolidated financial statements for the big banks. When interpreting the results, this difference in the data basis should be taken into account.

Income statement

Of the 275 banks (2013: 283), 246 recorded an annual profit (2013: 235) and 29 an annual loss (2013: 48). The total annual profit for all the banks increased by CHF 2.3 billion to CHF 14.2 billion, while the total annual loss rose by CHF 5.4 billion to CHF 6.8 billion. Individual banks influenced the overall annual result significantly. The following three items in particular recorded high values: extraordinary income (up CHF 0.7 billion to CHF 7.0 billion), depreciation and amortisation of fixed assets (CHF 7.6 billion, as in the previous year) and expenses relating to value adjustments, provisions and losses (up CHF 4.7 billion to CHF 9.0 billion). The latter were principally due to litigation-related expenses at the big banks and foreign-controlled banks.

Gross profit was up by CHF 1.5 billion to CHF 21.0 billion. This 7.7% rise was attributable, in particular, to net interest income at big banks; the decline in interest income was lower than that in interest expenses. Moreover, lower operating expenses and an increase in the other result from ordinary activities item helped to increase gross profit. The net income from commission business and services and the result from trading activities both decreased.

¹ Individual financial statements as required by law (parent company) relate to the business conducted by the banks' head offices in Switzerland and their legally dependent domestic and foreign branches. Consolidated financial statements, by contrast, also include business conducted by the banks' legally independent subsidiaries in Switzerland and in other countries (banks and non-banks).

Press release**Balance sheet business**

In the year under review, the aggregate balance sheet total for all banks in Switzerland rose by CHF 192.6 billion (6.8%) to CHF 3,041.7 billion. The increase was primarily attributable to foreign balance sheet items. Foreign assets grew by CHF 146.3 billion to CHF 1,428.7 billion; foreign liabilities, by CHF 136.1 billion to CHF 1,463.4 billion. Foreign claims and foreign liabilities in US dollars, in particular, increased. Domestic assets were up by CHF 46.3 billion to CHF 1,613.0 billion; domestic liabilities, by CHF 56.5 billion to CHF 1,578.4 billion.

Although the growth in foreign business was stronger, in comparative terms, domestic assets and domestic liabilities continued to account for more than half of the balance sheet total.

Domestic mortgage loans, which make up approximately 30% of the aggregated balance sheet total, continued to rise in the year under review, growing by CHF 31.0 billion (3.6%) to CHF 900.9 billion. The largest contribution to this increase was made by the cantonal banks (up CHF 12.0 billion to CHF 315.4 billion), the Raiffeisen banks (up CHF 7.2 billion to CHF 150.5 billion) and the big banks (up CHF 5.7 billion to CHF 264.1 billion). Sundry loans, which are entered under amounts due from customers, rose by CHF 88.2 billion to CHF 652.9 billion. This sharp rise was due to lending abroad, which was up by CHF 92.2 billion (23.7%) to CHF 481.3 billion. Liquid assets were up by CHF 26.5 billion to CHF 425.9 billion.

In 2014, customer deposits increased again. Amounts due to customers in savings or deposit accounts rose by CHF 37.8 billion (6.3%) to CHF 639.5 billion. Since 2008, customer deposits in savings or deposits accounts have grown by more than 6% each year. In the year under review, the increase was mainly attributable to domestic deposits (up CHF 35.3 billion to CHF 591.7 billion). Other amounts due to customers increased by CHF 57.1 billion (5.3%) to CHF 1,130.4 billion. The major part of this rise was in US dollars (up CHF 46.5 billion to CHF 409.3 billion) and related to customers abroad (up CHF 50.3 billion to CHF 631.0 billion). For the first time since 2007, time deposits included under this balance sheet item recorded an increase (up CHF 10.8 billion to CHF 257.0 billion). Amounts due from cash bonds decreased by CHF 2.2 billion to CHF 23.7 billion.

Securities held in custody accounts

Customer holdings of securities in bank custody accounts increased by CHF 474.9 billion (9.2%) to CHF 5,644.9 billion. Custody account holdings thus exceeded the previous record level of CHF 5,402.3 billion, which had been attained in 2007, with the rise in share prices constituting a major element in this development.

Custody account holdings were up for all categories of securities. The largest position among the categories of securities, with a share of 40.0%, are investments in shares, and these increased by 8.4% to CHF 2,256.8 billion. Units in collective investment schemes were also up significantly, by 16.0% to CHF 1,803.5 billion. Somewhat slower growth was recorded in bonds (up 2.8% to CHF 1,313.6 billion) and structured products (up 6.9% to CHF 202.6 billion).

The most important investment currency was still the Swiss franc (share: 51.0%), followed by the US dollar (24.5%) and the euro (16.0%). Compared with 2013, investments in US dollars recorded the strongest percentage increase (up 20.1%); investments in Swiss francs also rose (up 9.2%), while investments in euros declined slightly (down 3.5%).

Fiduciary transactions

Fiduciary funds administered by the banks have been declining since 2008, and in the year under review, this trend continued (down CHF 5.7 billion to CHF 115.1 billion), although the decrease was less pronounced than in previous years. Once again, fiduciary funds invested in euros recorded the greatest decline, down by CHF 6.3 billion (30.0%) to CHF 14.6 billion. Fiduciary funds invested in Swiss francs decreased by CHF 0.4 billion to CHF 5.3 billion, while those invested in US dollars were up by CHF 0.2 billion to CHF 74.5 billion. The US dollar remained the most important investment currency for fiduciary funds (up 3.2 percentage points to 64.8%). The share of fiduciary funds invested in euros declined (by 4.6 percentage points to 12.7%), as did that in Swiss francs (by 0.1 percentage points to 4.6%).

Employment

The number of staff (in terms of full-time equivalents) decreased by 1,844 (or 1.5%) from the previous year to 125,289. This reduction primarily affected jobs in Switzerland (down 1,710, or -1.6%, to 104,053). The number of staff employed abroad decreased by 133 (down 0.6%) to 21,237. The majority of these staff reductions occurred at the big banks, both in Switzerland (down 1,237 to 36,083 jobs) and abroad (down 125 to 17,326 jobs). The number of employed men was down by 1,271 to 77,592. That of employed women declined by 573 to 47,697 full-time equivalents, increasing the share of women in banking employment from 38.0% to 38.1%.

¹ Part-time, apprenticeship and trainee positions are weighted.

² Raiffeisen Group and 305 (2013: 316) Raiffeisen banks.

³ As of 2008, institutions in group 5.11 are included in group 5.12 or 5.14.

⁴ In 2014, four banks that had previously been categorised as private bankers changed their legal form, becoming joint-stock companies. They have thus been categorised as stock exchange banks since the 2014 reporting year. For further details, please consult the 2014 edition of *Banks in Switzerland*.

¹ As of 2008, institutions in group 5.11 are included in group 5.12 or 5.14.

² In 2014, four banks that had previously been categorised as private bankers changed their legal form, becoming joint-stock companies. They have thus been categorised as stock exchange banks since the 2014 reporting year. For further details, please consult the 2014 edition of *Banks in Switzerland*.

¹ In 2014, four banks that had previously been categorised as private bankers changed their legal form, becoming joint-stock companies. They have thus been categorised as stock exchange banks since the 2014 reporting year. For further details, please consult the 2014 edition of *Banks in Switzerland*.

¹ More information on holdings of securities in bank custody accounts may be found in the *Monthly Statistical Bulletin* published by the SNB.

² Adjustments were made to the reporting of holdings of securities in 2005, when a number of banking institutions updated the breakdown of their sectoral and securities reporting. Consequently, time series comparisons for some of the data are difficult.

³ Further information on reporting entities and reporting institutions may be found in the section entitled *Explanatory notes on the banking statistics* in the SNB publication, *Banks in Switzerland*.

⁴ Allocation to the business sectors pursuant to the 2008 version of the Swiss business classification code, NOGA: private customers (no NOGA code, 97–98), commercial customers (01–63, 68–842, 85–96, 99), institutional investors (64–66, 843), financial and asset management institutions (642–649 and no NOGA code), insurance companies and pension funds (65), pension funds (653).

⁵ Since 2012, the data published have also included institutions with a special field of business.

⁶ Until 2004, holdings of non-profit institutions serving households were reported together with the holdings of private customers. As of 2005, they are reported under commercial customers.

⁷ Excluding banks for resident custody account holders, including banks for non-resident custody account holders.
